

According to its commitment to the EU Ecolabel, the Louison Hotel has implemented some initiatives in order to reduce its impact on the environment in the following areas:

## ENERGY

- 100% LEDs
- Thermal regulation
- 100% of the electricity consumption offset in the form of renewable energy
- 1 kWh consumed = 1 euro given to renewable energy research
- 100% of the CO<sub>2</sub> consumption is neutralized by the purchase of "carbon credits"
- Double glazing
- Corridor equipped with motion sensors, rooms with card readers
- Outdoor lights switched off during the night

## WATER

- Bathroom towels are reused except if customers are willing to change them during the stay
- The hotel is cleaned up with dry heat (only 330ml of water per room) **NEW**
- Water regulators have been placed on all the taps

## GARBAGE

- Individual packaging have been abolished (breakfast and welcoming products)
- Cheese and cooked meat by weight
- Recycling strictly done by the hotel
- 2 recycling bins have been placed in the rooms for the customers
- Batteries, light bulbs and ink cartridge are recycled
- Furniture recycled through a second-hand trade in cooperation with non-profits

## CHEMICAL PRODUCTS

- Eco label washing powder
- All washing products have been replaced by dry heat since July 2019

## PURCHASES

- Local products: purchase of break and French pastries in a bakery in the neighborhood
- Homemade yogurts
- Fair trade laundry
- Reduction of the packaging used for deliveries

You too, participate to our eco-friendly initiatives by adopting the right gestures!
